

## What should I already know?

- That litter pollutes the environment and affects wildlife.
- We should reduce, reuse and recycle plastic products.
- Sustainable living is important for everyone.

Fish have backbones and have gills to breathe.

Mammals have backbones and have lungs to breathe.

A habitat is the home of a plant or animal.

## Key Vocabulary and definitions

sustainability	The way we live on Earth to make sure that people, now and in the future, have everything they need.
ocean	A huge body of salt water - they cover over 70% of the surface of the earth.
current	A movement of water or air in the same direction.
plastic	A material made from oil which can be moulded into any shape.
decompose	To break down into basic material.
micro-plastic	Plastic which has broken down into tiny parts.
ingest	To eat.
destruction	To destroy and damage.

- We will learn about the journey plastic take into our oceans.
- We will discover how long plastic takes to break down (decompose).
- We will observe the effect of plastic on the ocean habitat and persuade humans to make better choices.
