What I need to do to be a sound engineer/DJ:

1. Do well in a-levels and go to a good university.

2. Go on a course to learn sound and DJing skills (and how to use the required equipment)

3. Save money to buy Sound and DJing equipment (E.G. Speakers, P.A System, mixer, etc.)

4. Join a radio station and get a job in sound engineering.

5. PRACTICE!!! (Because it makes perfect!)

6. Make my own radio show and hire other people to join my company.
